

Goodman® Furnaces & Air Conditioners

Proven equipment. Honest pricing. Backed by one of the best warranties in the business.

Why Goodman?

Goodman has built dependable, affordable heating and cooling equipment since 1975, and today it's backed by Daikin — the largest HVAC manufacturer in the world. Millions of American homes run on Goodman because it delivers solid performance without the premium-brand markup. It's the equipment we trust enough to put our own name behind.

Gas Furnaces

80% & 96% AFUE

Single-stage · Two-stage · Variable-speed

- ✓ 96% AFUE models turn 96 cents of every gas dollar into heat — a big step up from an aging 80% or old 60–70% unit
- ✓ Energy-efficient multi-speed and ECM blower motors for quieter, more even airflow
- ✓ Two-stage models run low and slow most of the time — fewer temperature swings, less noise
- ✓ Heavy-gauge aluminized-steel tubular heat exchanger built for Michigan winters
- ✓ Durable, service-friendly design — parts are easy to get, repairs stay affordable for the life of the unit

Air Conditioners

13.4 – 17+ SEER2

Single-stage & two-stage

- ✓ SEER2-rated efficiency — higher ratings mean real savings on summer electric bills
- ✓ High-efficiency scroll compressor, the workhorse at the heart of the system
- ✓ Current lineup uses next-generation R-32 refrigerant — better efficiency, lower environmental impact
- ✓ Two-stage models deliver stronger humidity removal and steadier temps on muggy Michigan days
- ✓ Factory-matched with the right coil and furnace so the whole system performs as rated

Up to a 10-YEAR parts limited warranty — see the back for how it works

One quick registration doubles your parts coverage. We'll show you how (or handle it with you at install).

Every Mechanical Temp Installation Includes

- ✓ Proper sizing for your home — not just matching the old unit
- ✓ Full startup, combustion & refrigerant charge verification
- ✓ Thermostat check (or Sensi smart upgrade — ask us)
- ✓ Permits pulled and inspections handled
- ✓ Haul-away and disposal of your old equipment
- ✓ Warranty registration walkthrough before we leave

Your Goodman Warranty, Explained

The one thing to do after installation: register. It's free and it doubles your parts coverage.

STANDARD (not registered)

5

YEARS PARTS

Automatic coverage if you do nothing
Limited parts warranty · labor not included

REGISTERED (within 60 days)

10

YEARS PARTS

Just register online — takes about 5 minutes
Limited parts warranty · labor not included

How to Register (Don't Skip This!)

- 1 Find your model & serial numbers — they're on your invoice, and we leave them with your paperwork.
- 2 Go to goodmanmfg.com and click Product Registration (or ask us — we're happy to walk you through it at install).
- 3 Do it within 60 days of installation. Miss the window and coverage stays at the standard 5 years.

What the Parts Warranty Covers

- ✓ Functional parts that fail due to manufacturer defect
- ✓ Replacement part provided at no charge through Goodman
- ✓ Coverage stays with your registered equipment

Good to Know

- ✗ Labor to diagnose and install parts is not included — that's standard across the HVAC industry, every brand
- ✗ Routine maintenance items (filters, etc.) aren't warranty parts
- ✓ Ask us about labor coverage and maintenance plan options

Questions about your proposal or warranty?

We're happy to go line by line — no pressure, no surprises.
