

Sensi™ Smart Wi-Fi Thermostat

Total comfort control — from anywhere, on any phone.

Save about 23% on HVAC energy*

ENERGY STAR® certified and built by Copeland (Emerson) — the company behind the components inside most furnaces and A/C units. Smart scheduling, remote access, and usage reports pay for the thermostat in lower utility bills.

ENERGY STAR® CERTIFIED

Control From Anywhere

Adjust temperature, mode, and fan from the top-rated Sensi app on iOS or Android — at work, on vacation, or from the couch.

Flexible 7-Day Scheduling

Program up to 8 comfort events per day, per day of the week. Toggle the schedule on or off with one tap.

Smart Alerts

Get app and email notifications for extreme temps, high humidity, or loss of heating/cooling — before a small problem becomes a big one.

Usage Reports

See daily and historical heat, cool, and fan runtimes plus monthly energy summaries, so you know exactly where your money goes.

Geofencing

Uses your phone's location to automatically set back the temperature when you leave and restore comfort before you're home.

Voice & Smart Home

Works with Amazon Alexa, Google Assistant, Samsung SmartThings, and Apple HomeKit/Siri. "Alexa, set the thermostat to 68."

Maintenance Reminders

Filter change reminders and HVAC service alerts help your equipment run efficiently and last longer.

Circulating Fan Mode

Runs the fan a set number of minutes per hour to even out hot and cold spots and improve indoor air quality.

Specs, Compatibility & Professional Install

Sensi Smart Wi-Fi Thermostat · Installed by Mechanical Temp

At a Glance

SIZE

5.88" W × 3.75" H × 1" D — same footprint as a traditional thermostat (no patching or painting)

WI-FI

Connects to your 2.4 GHz home network; guided setup through the Sensi app

POWER

AA battery backup; c-wire not required for most conventional heat/cool systems

DISPLAY

Large 5 sq. in. backlit screen with physical buttons — easy to read day or night

SECURITY

Keypad lockout keeps settings locked; strong data-privacy design

WARRANTY

3-year manufacturer warranty

Will It Work With My System?

- ✓ Gas, oil, and electric forced-air furnaces
- ✓ Central air conditioning
- ✓ Heat pumps with or without auxiliary heat
- ✓ Most single- and multi-stage systems

Heat-only, cool-only, heat pump, and zoned systems need a common (c) wire — we verify wiring and add one if needed. Not for electric baseboard heat. We confirm compatibility before any work begins.

Why Have Mechanical Temp Install It?

- 1 Right the first time**
20+ years of hands-on HVAC experience. We verify your system type, stages, and wiring before we mount anything.
- 2 C-wire handled**
Missing a common wire? We add or adapt one properly — no bootleg fixes that fry a control board later.
- 3 Configured for YOUR equipment**
Heat pump balance points, aux-heat lockouts, fan and cycle settings dialed in for your specific system — not factory defaults.
- 4 Wi-Fi & app set up before we leave**
Connected to your network, app installed on your phone, schedule and alerts configured, and a quick walkthrough so you're comfortable using it.
- 5 Whole-system check included**
While we're there, we look over your heating and cooling equipment and flag anything that needs attention.

Want more? Ask about Sensi Touch

Prefer a color touchscreen, or have rooms that never feel right? The Sensi Touch line supports add-on room sensors that balance temperatures across your whole home.

Ready for smarter comfort?

Call or text to schedule your Sensi installation — most installs completed same visit.
